

Through the web page of the Agricultural Meteorological Programme, under the Commission for Agricultural Meteorology, one can have access to the National Progress Reports on Agricultural meteorology of CAgM member countries. One will find there the following text:

The WMO Secretariat prepared and circulated a detailed questionnaire for the preparation of National Reports on Progress Made in Agricultural Meteorology by Members during 1999-2001 per Recommendation 1 of CAgM-XII. The Commission was pleased that 89 members responded to the request and this was a 65 percent increase over the preceding intersessional period. This information was then entered into a database.

In accordance with Recommendation 1 of CAgM-XIII, the WMO Secretariat will continue to compile the information in a comprehensive database and to make it available to members. Since there is a large amount of information, PDF files are provided for ease of use for viewing and printing. Also, the complete MS Excel database is provided for members.

Questionnaire Used (MS Word)

Database of National Progress Reports (PDF)

Countries A to E

Countries F to M

Countries N to S

Countries T to Z

Complete Database (MS Excel)

We urge INSAM readers to make use of this unique database on agrometeorology, which belongs to the contemporary history of agrometeorology.
